Gender: Male Date of birth: 16/11/2000

ABOUT ME

Dynamic Full Stack Developer with a strong foundation in Mechanical Engineering from Anna University, Chennai. Skilled in **frontend and backend development**, including **JavaScript, React.js, Node.js**, and foundational expertise in **HTML, CSS**, and various digital tools. Known for excellent **communication skills, creativity**, and a commitment to **continuous learning**. Passionate about leveraging technical expertise and collaboration to deliver impactful and innovative solutions.

WORK EXPERIENCE

AI Model Trainer

OutlierAI [07/2024-current]

Responsibilities:

- Designed, trained, and optimized machine learning models to improve predictive accuracy and performance.
- Processed and labelled large datasets to ensure high-quality training inputs for AI models.
- Conducted regular performance evaluations and implemented improvements to enhance model outcomes.

EDUCATION

B.E. Mechanical Engineering

College of Engineering, Guindy – Chennai, India
[2018 – 2022]

CGPA: 8.02

Key Subjects and Skills:

Engineering Management, Entrepreneurship Development, Engineering Graphics, Programming Fundamentals, Mechanical Concepts

TECHNICAL SKILLS

Frontend Development:

- HTML5, CSS3, JavaScript (ES6+)
- Frameworks: React.js
- Responsive Design: Bootstrap, Material-UI,
- Version Control: Git, GitHub
- State Management: Redux, Context API

Backend Development and Database:

- Node.js, Express.js
- RESTful API Development
- NoSQL: MongoDB

PROJECTS

1. Wedding Planner Website

Technologies Used: React.js, Redux, Node.js, Express.js, MongoDB, Material-UI, JWT

Description: Developed a wedding planner web application to manage venues, guest lists, and vendor coordination. Features include user authentication and dynamic event calendars. Handled API integration for smooth frontend-backend communication.

Outcome: Strengthened full-stack development skills by implementing scalable APIs, improving user experience with a responsive UI, and optimizing data synchronization.

2. Google Forms Clone

Technologies Used: React.js, CSS, Node.js, Express.js, MongoDB.

Description: Built a Google Forms-inspired application for creating, customizing, and analyzing surveys. Included real-time previews, multiple question types, and analytics dashboards to track user responses.

Outcome: Gained hands-on experience in form validation, real-time previews and delivering a responsive and user-friendly tool.

3. Billing Web App

Technologies Used: React.js, Bootstrap, Node.js, Express.js, MongoDB,

Description: Developed a billing application for small businesses to efficiently manage and generate invoices. The app allows businesses to create customizable invoices, track billing statuses, and maintain an organized record of transactions. It simplifies the billing process by offering real-time updates and easy access to past invoices.

Outcome: Simplified billing processes, reduced manual effort, and improved reporting with real-time visualization and export features.

4. E-Commerce Bookstore Website

Technologies Used: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, Stripe API, Tailwind CSS

Description: Developed an e-commerce platform for an online bookstore, allowing users to explore a wide variety of books, add them to their shopping cart, and complete their purchase easily. The platform offers a smooth, user-friendly browsing experience and efficient shopping cart functionality for seamless book selection and checkout.

Outcome: Enhanced knowledge of advanced filtering, and state management, delivering a fully functional e-commerce solution.
